SUMMARY

I'm seeking to change professional career. Having built a strong persona as a Senior restaurant manager, my desire is to change to my ultimate passion, entertainment and media, I wish to align myself with a strong innovative company looking to get someone in from the bottom and let them build themselves with the company. I'm dynamic and accomplished as a catering and food service professional with prior work in entertainment (*which is my first love*), social and corporate markets and another of my passions, Information Technology. My notable success in large-scale event planning, food preparation management, menu development and creation is a testament to my hard working, eager to learn and progressive personality. My determination and drive is to study, learn and build myself into a mobile app developer, for myself and more than likely in my spare time. If I don't know the solution, I'll find it and implement it.

DRIVES

I learn quickly and I love doing it. Experience to me is the key to success, as such I strive to build my own knowledge so that I can exceed in my accomplishments and build on my experience. I thrive in social environments, a little bit of healthy competition keeps me on my toes, be it in work, success or leisure. I want to have an impact on the world by creating something that people will remember.
